

Author rights

Named Author(s) of articles published on a subscription basis, who submitted an Assignment of copyright and publication agreement (the “Copyright Form”) to the Journals listed at the bottom of this policy from 26 April 2016, are granted, in addition to those rights set out in the Copyright Form, the following additional rights.

This policy does not apply to ‘Gold open access articles’, published under a [CC BY licence](#) or a [CC BY-NC-SA licence](#) on payment of an article publication charge. Please refer to our [FAQs](#) setting out rights granted under such Gold open access licences.

Capitalised words are defined terms, which are set out in the definitions section at the bottom of this policy. Please ensure you read them.

Author rights

Each Named Author of an article published on a subscription basis may post the Preprint or Author’s Original to arXiv/bioRxiv at any time, provided they select the ‘non-exclusive licence to distribute’ and not an open access or Creative Commons Licence when uploading the article.

After acceptance each Named Author of an article published on a subscription basis may:

- post the Preprint or Author’s Original to a repository, Scientific Social Network or third party website (in all cases only where non-commercial) at any time, but not on the websites of other publishers, provided:
 - (i) they do not assign its copyright,
 - (ii) they do not grant an exclusive licence to it, and
 - (iii) it is not made available under any open access or Creative Commons Licence
- post the Accepted Manuscript, accompanied by a Statement of Provenance, at any time on their Personal Website but not under any form of open access or Creative Commons Licence and only where any copyright notice is not deleted or modified. IOP Publishing defines ‘Personal Website’ to be a “website and/or blog relating to the author and their work, the content of which is controlled by them and (i) may be on their personal page on their institution or department’s website or (ii) may be hosted by them at a separate IP address or mobile site altogether, which could be linked directly to their institution’s or department’s website. It does not include their institution’s subject or department pages, an institutional or subject repository or a page on a Scientific Social Network or any form of commercial site”
- post the Accepted Manuscript, accompanied by a Statement of Provenance, on their employer’s or institution’s website after the Embargo Period but not under any form of open access or Creative Commons Licence and only where any copyright notice is not deleted or modified
- post the Accepted Manuscript, accompanied by a Statement of Provenance, on an institutional repository or subject repository (in both cases only where non-commercial) after the Embargo Period but not under any form of open access or Creative Commons Licence and only where any copyright notice is not deleted or modified. This will satisfy the requirements of most research funders for ‘Green open access’, such as RCUK, HEFCE, Chinese Academy of Sciences, US National Institutes of Health, NASA, NSF, US Department of Energy, NIST, National Research Council of Canada and Austrian Science Fund, to deposit the outputs of research funded by them in a repository
- post the Accepted Manuscript, accompanied by a Statement of Provenance, to a non-commercial Scientific Social Network after the Embargo Period but not under any form of open access or Creative Commons Licence and only where any copyright notice is not deleted or modified
- not post the Accepted Manuscript, Final Published Version or Version of Record to any commercial Scientific Social Network, commercial repository or any other publisher website. For example ResearchGate, Mendeley* and Academia.edu are commercial Scientific Social Networks and so these versions of the article may not be posted to them or shared on them.
- *post the Accepted Manuscript in their private library on Mendeley (their private document file space which is not accessible by third parties)

Author rights

- post the Accepted Manuscript, accompanied by a Statement of Provenance, to arXiv/bioRxiv after the Embargo Period, provided they select the 'non-exclusive licence to distribute' and not an open access or Creative Commons Licence when uploading the article. However, a limited number of IOP Publishing journals allow Named Authors to post the Accepted Manuscript to arXiv at any time (please note that this does not apply to bioRxiv) provided they select the 'non-exclusive licence to distribute' and not an open access or Creative Commons Licence:
 - *Journal of Physics A: Mathematical and Theoretical*
 - *Journal of Physics G: Nuclear and Particle Physics*
 - *Classical and Quantum Gravity*
 - *Journal of Cosmology and Astroparticle Physics*
 - *Journal of Instrumentation*
 - *Journal of Statistical Mechanics: Theory and Experiment*
 - *European Journal of Physics*
- post the abstract at any time after publication of the Final Published Version, on any repository, Scientific Social Network or third party website (in all cases only where non-commercial) but not on the websites of other publishers, provided in all cases that authors include a link via DOI to the abstract page of the article on IOPscience
- post the Accepted Manuscript to an institutional repository or a subject repository (in both cases only where non-commercial) where necessary to comply with the requirements of the HEFCE post-2014 REF policy. The process is as follows:
 - for articles with a Date of Acceptance between 1 April 2016 and 31 March 2018, Named Authors may make a Closed Deposit of the Accepted Manuscript to the non-commercial repository within three months of the Date of Publication of the article; or
 - for articles with a Date of Acceptance on or after 1 April 2018, Named Authors may make a Closed Deposit of the Accepted Manuscript to the non-commercial repository within three months of the Date of Acceptance of the article; and
 - after the Embargo Period, the full text of the Accepted Manuscript may be made available on the non-commercial repository for anyone with an internet connection to read and download
- not post or share the Final Published Version or Version of Record online in any circumstances, except as set out in the Copyright Form for the article. The Final Published Version and Version of Record may only be published by IOP Publishing on IOPscience.

Once the Final Published Version has been published, authors should add citation details and a link from their postings of Preprints/Author's Originals and/or Accepted Manuscripts to the Version of Record via DOI. IOP Publishing also requires that authors include the Statement of Provenance as set out below.

A Creative Commons Licence, or any other form of open access licence, may not be attached to articles published under the subscription model. For example, authors may not post the Accepted Manuscript in non-commercial repositories or non-commercial Scientific Social Networks which automatically apply an open access licence to the article which grants reuse rights under the terms of the repository or Scientific Social Network.

Author rights

Definitions

Definition of the versions of an article:

- **Author's Original** is “the version of the article before peer review or editing, as submitted by an author to the journal”
- **Accepted Manuscript** is “the version of the article accepted for publication including all changes made as a result of the peer review process, and which may also include the addition to the article by IOP Publishing of a header, an article ID, a cover sheet and/or an ‘Accepted Manuscript’ watermark, but excluding any other editing, typesetting or other changes made by IOP Publishing and/or its licensors”
- **Final Published Version** is “the peer reviewed, edited, formatted & typeset version of the article including any tagging, indexing and other enhancements published by IOP Publishing and/or its licensors”
- **Version of Record** is “the Final Published Version, including any post publication corrections or enhancements and any other changes made by IOP Publishing and/or its licensors”

Other definitions:

- **Closed Deposit** means “the abstract of the article is discoverable to anyone with an internet connection on a non-commercial institutional or non-commercial subject repository but the full text is not available to read or download during the Embargo Period.”
- **Creative Commons Licence** is “one of several public open access licenses that enable the free distribution of an otherwise copyrighted work, subject to adhering to certain terms as specified in the licence – <https://creativecommons.org/>.”
- **Date of Acceptance** is “the date that the author is notified by the Journal that (i) their manuscript has been reviewed by the Journal or conference (normally via peer review), (ii) all academically necessary changes have been made in response to that review, (iii) the article is ready to be passed to production for copy-editing and typesetting and (iv) therefore the article has been accepted.
- **Date of Publication** is “the date of first online publication on IOPscience of the Final Published Version by the Journal, as that date is specified on the article”
- **Embargo Period** is “a period of 12 months from the Date of Publication”
- **Named Author** is “each of the authors named as an author on the article” and **Named Authors** shall be construed accordingly
- **Personal Website** is a “website and/or blog relating to the author and their work, the content of which is controlled by them and (i) may be on their personal page on their institution or department’s website or (ii) may be hosted by them at a separate IP address or mobile site altogether, which could be linked directly to their institution’s or department’s website. It does not include their institution’s subject or department pages, an institutional or subject repository or a page on a Scientific Social Network or any form of commercial site”
- **Scientific Social Network** is an “online scientific community platform for scientific communication and interactivity which generally includes, but is not limited to, users having the ability to chat and make comments on forums, post their profiles, deposit documents in repository facilities, share information and research, find collaborators, work on shared documents together and manage collaborative projects within groups”
- **Statement of Provenance:** “This is an author-created, un-copyedited version of an article accepted for publication/published in [insert name of journal]. IOP Publishing Ltd is not responsible for any errors or omissions in this version of the manuscript or any version derived from it. The Version of Record is available online at [insert DOI]”

IOP Publishing reserves the right to issue take-down notices to anyone or any site which infringes this policy or to take other action as it considers to be appropriate.

In the case of any discrepancy between the definitions contained on this page and those on the Copyright Form, the definitions on this page will prevail.

Author rights

This policy applies to all articles submitted to and published by the following:

- *2D Materials*
- *Biofabrication*
- *Bioinspiration and Biomimetics*
- *Biomedical Materials*
- *Biomedical Physics & Engineering Express*
- *Classical & Quantum Gravity*
- *Convergent Science Physical Oncology*
- *European Journal of Physics*
- *Flexible and Printed Electronics*
- *Inverse Problems*
- *Journal of Breath Research*
- *Journal of Geophysics and Engineering*
- *Journal of Micromechanics and Microengineering*
- *Journal of Neural Engineering*
- *Journal of Optics*
- *Journal of Physics A: Mathematical and Theoretical*
- *Journal of Physics B: Atomic Molecular and Optical Physics*
- *Journal of Physics: Condensed Matter*
- *Journal of Physics D: Applied Physics*
- *Journal of Physics G: Nuclear and Particle Physics*
- *Journal of Radiological Protection*
- *Laser Physics*
- *Laser Physics Letters*
- *Materials Research Express*
- *Measurement Science and Technology*
- *Methods and Applications in Fluorescence*
- *Metrologia*
- *Modelling and Simulation in Materials Science and Engineering*
- *Nanotechnology*
- *Nonlinearity*
- *Physica Scripta*
- *Physical Biology*
- *Physics Education*
- *Physics in Medicine and Biology*
- *Physiological Measurement*
- *Plasma Physics and Controlled Fusion*
- *Plasma Sources Science and Technology*
- *Quantum Science and Technology*
- *Reports on Progress in Physics*
- *Semiconductor Science and Technology*
- *Smart Materials and Structures*
- *Superconductor Science and Technology*
- *Surface Topography: Metrology and Properties*
- *Translational Materials Research*

(each a “Journal” and together the “Journals”).
