

Current Policy – Author Rights Policy for subscription articles for which the copyright form was submitted on or after 26 April 2016

The **Named Author(s) of articles published on a subscription basis, who submitted the standard Journal copyright form** (the 'Copyright Form') **to one of the Journals listed at the bottom of this policy on or after 26 April 2016**, are granted, in addition to those rights expressly set out in the Copyright Form, additional rights set out below.

This policy does not apply to 'gold open access articles', published under a [CC BY licence](#) or a [CC BY-NC-SA licence](#) on payment of an article publication charge. Please refer to IOP Publishing's policy setting out general information on the rights granted under such Gold open access licences.

Capitalized words are defined terms, which are set out in the 'Definitions' section at the bottom of this policy. Please ensure that you read them carefully so that you fully understand this policy.

Please also ensure that you understand to which [version](#) of the article Named Author(s) are granted certain use rights. A definition of what we mean by each version is set out in the 'Definitions' section at the end of this policy.

All versions of articles published under the subscription model are fully protected by copyright, unless expressly stated otherwise on the cover sheet attached to the specific version of the article by IOP Publishing.

Pre-publication policy: Preprint/Author's Original

Please refer to our [Preprint pre-publication policy](#).

Author rights: Preprint/Author's Original

After acceptance

Each Named Author of an article to be published/published on a subscription basis may post the Preprint or Author's Original to those sites listed in the [Preprint pre-publication policy](#) at any time.

Each Named Author of an article to be published/published on a subscription basis may post the Preprint or Author's Original to a non-commercial third party website at any time after the article has been accepted, but not on the websites of other publishers, provided that:

- (i) you do not transfer (assign) ownership of its copyright
- (ii) you do not grant an exclusive licence to it, and
- (iii) it is not made available under any open access or Creative Commons Licence.

Once the Final Published Version has been published, authors should add citation details and a link from their posting of the Preprint/Author's Original to the Version of Record via its Digital Object Identifier (DOI). IOP also requires that Named Authors include the Statement of Provenance as set out below.

Current Policy – Author Rights Policy for subscription articles for which the copyright form was submitted on or after 26 April 2016

Author rights: Accepted Manuscript

After acceptance, each Named Author of an article to be published/published on a subscription basis may:

- Post the Accepted Manuscript at any time on their Personal Website, provided that any copyright notice is not deleted or modified. It may not be posted under any form of open access or Creative Commons Licence (unless such a licence has been applied to the Accepted Manuscript's cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence after the Embargo Period).
- Post the Accepted Manuscript on their employer's or institution's website after the Embargo Period, provided that any copyright notice is not deleted or modified. It may not be posted under any form of open access or Creative Commons Licence (unless such a licence has been applied to the Accepted Manuscript's cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence).
- Post the Accepted Manuscript on an institutional repository or subject repository (in both cases ONLY where non-commercial) after the Embargo Period, provided that any copyright notice is not deleted or modified. It may not be posted under any form of open access or Creative Commons Licence (unless such a licence has been applied to the Accepted Manuscript's cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence).

The above should satisfy the requirements of research funders for 'green open access', such as the Chinese Academy of Sciences, US National Institutes of Health, NASA, NSF, US Department of Energy, NIST, National Research Council of Canada and Austrian Science Fund, to deposit the outputs of research funded by them in a repository.

- Post the Accepted Manuscript to an institutional repository or a subject repository (in both cases ONLY where non-commercial) where necessary to comply with the requirements of the HEFCE post-2014 REF policy.

The process is as follows:

- For articles with a Date of Acceptance between 1 April 2016 and 31 March 2018, Named Authors may make a Closed Deposit of the Accepted Manuscript to the non-commercial repository within three months of the Date of Publication of the article; or
- For articles with a Date of Acceptance on or after 1 April 2018, Named Authors may make a Closed Deposit of the Accepted Manuscript to the non-commercial repository within three months of the Date of Acceptance of the article; and
- In both the above cases, after the Embargo Period, the full text of the Accepted Manuscript may be made available on the non-commercial repository for anyone with an internet connection to read and download.
- Post the Accepted Manuscript to a non-commercial Scientific Social Network after the Embargo Period, provided that any copyright notice is not deleted or modified. It may not be posted under any form of open access or Creative Commons Licence (unless such a licence has been applied to the Accepted Manuscript's cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence).
- NOT post the Accepted Manuscript to any commercial Scientific Social Network, commercial repository or any other publisher website. For example, ResearchGate, Mendeley* and Academia.edu are commercial Scientific Social Networks and so the Accepted Manuscript of the article may not be posted to them or shared on them.
- *Post the Accepted Manuscript, in their private library on Mendeley (their private document file space which is not accessible by third parties), provided that any copyright notice is not deleted or modified. It may not be posted under any form of open access or Creative Commons Licence (unless such a licence has been applied to the Accepted Manuscript's cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence after the Embargo Period).

Current Policy – Author Rights Policy for subscription articles for which the copyright form was submitted on or after 26 April 2016

- Post the Accepted Manuscript to arXiv/bioRxiv after the Embargo Period, provided that any copyright notice is not deleted or modified and you select the ‘non-exclusive licence to distribute’ and not an open access or Creative Commons Licence when uploading the article (unless such a licence has been applied to the Accepted Manuscript’s cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence).

However, a limited number of IOP journals allow Named Authors to post the Accepted Manuscript to arXiv at any time (please note that this does not apply to bioRxiv) provided that any copyright notice is not deleted or modified and you select the ‘non-exclusive licence to distribute’ and not an open access or Creative Commons Licence (unless such a licence has been applied to the Accepted Manuscript’s cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence after the Embargo Period). The journals this currently applies to are:

- Journal of Physics A: Mathematical and Theoretical
- Journal of Physics G: Nuclear and Particle Physics
- Classical and Quantum Gravity
- Journal of Cosmology and Astroparticle Physics
- Journal of Instrumentation
- Journal of Statistical Mechanics: Theory and Experiment
- European Journal of Physics

Once the Final Published Version has been published on IOPscience, in all cases where the Accepted Manuscript has been posted, Named Authors must add citation details and a link from your posting of the Accepted Manuscript to the Version of Record via DOI. IOP requires that Named Authors include the Statement of Provenance as set out in the ‘Definitions’ section below.

Named Authors may not post the Accepted Manuscript in any repositories, Scientific Social Networks or websites that automatically apply an open access licence to the article granting reuse rights under the terms of the repository, Scientific Social Network or website (unless such a licence has been applied to the Accepted Manuscript’s cover sheet by IOP, in which case it may only be posted under that Creative Commons Licence after the Embargo Period). For clarity, IOP only currently publishes some Accepted Manuscripts under the [CC BY-NC-ND licence](#) (and this only applies after the Embargo Period). The cover sheet of the Accepted Manuscript should be checked to see if this licence has been applied by IOP. If it has not, then the Accepted Manuscript is fully protected by copyright.

Final Published Version and Version of Record

Named Authors are granted certain limited rights to use the Final Published Version of the article as expressly set out in the signed Copyright Form for the article. No use should be made of the Final Published Version except for those rights expressly granted to the Named Authors.

Named Authors may NOT post, share or deposit the Final Published Version or Version of Record online in any circumstances (this includes not posting it on their Personal Websites, not posting it to sites such as ResearchGate, Mendeley and Academia.edu, and not posting it to any other websites or repositories).

Third parties/subscribers cannot make the Final Published Version publicly available, or deposit it anywhere, post it online or share it with anyone who is not a subscriber to the particular Journal.

The Final Published Version and the Version of Record of articles published under the subscription model are fully protected by copyright and must only be published online by IOP or its licensors.

Current Policy – Author Rights Policy for subscription articles for which the copyright form was submitted on or after 26 April 2016

Author rights: abstracts

Each Named Author of an article published on a subscription basis may post the abstract at any time after publication of the Final Published Version, on any repository, Scientific Social Network or third party website (in all cases ONLY where non-commercial) but not on the websites of other publishers, provided in all cases that the Named Author includes a link via DOI to the abstract page of the Final Published Version of the article on IOPscience. No changes may be made to the abstract. Any links, brands, trademarks or copyright notices embedded in the abstract must remain intact.

Definitions

The following are IOP's definitions which apply to this policy.

Definition of the versions of an article:

- **Accepted Manuscript** is 'the version of the article accepted for publication including all changes made as a result of the peer review process, and which may also include the addition to the article by IOP Publishing of a header, an article ID, a cover sheet and/or an "Accepted Manuscript" watermark, but excluding any other editing, typesetting or other changes made by IOP Publishing and/or its licensors'.
- **Final Published Version** is 'the peer reviewed, edited, formatted and typeset version of the article, including any tagging, indexing and other enhancements published by IOP Publishing and/or its licensors'.
- **Preprint or Author's Original** is 'the version of the article before peer review or editing, as submitted by an author to the journal'.
- **Version of Record** is 'the Final Published Version, including any post publication corrections or enhancements and any other changes made by IOP Publishing and/or its licensors'.

Other definitions:

- **Closed Deposit** means 'only the abstract of the article is discoverable to anyone with an internet connection on a non-commercial institutional or non-commercial subject repository, and the full text is not available to read or download during the Embargo Period'.
- **Creative Commons Licence** is 'one of several public open access licences that enable the free distribution of an otherwise copyrighted work, subject to adhering to certain terms as specified in the licence: <https://creativecommons.org/>'.
- **Date of Acceptance** is 'the date that the author is notified by the Journal that (i) their manuscript has been reviewed by the Journal or conference (normally via peer review), (ii) all academically necessary changes have been made in response to that review, (iii) the article is ready to be passed to production for copy editing and typesetting and (iv) the article has been accepted'.
- **Date of Publication** is 'the date of first online publication on IOPscience of the Final Published Version by the Journal, as that date is specified on the article'.
- **Embargo Period** is 'a period of 12 months from the Date of Publication'.
- **Named Author** is 'each of the authors named as an author on the article' and **Named Authors** shall be construed accordingly.
- **Personal Website** is a 'website and/or blog relating to the author and their work, the content of which is controlled by them and (i) may be on their personal page on their institution or department's website or (ii) may be hosted by them at a separate IP address or mobile site altogether, which could be linked directly to their institution's or department's website. It does not include their institution's subject or department pages, an institutional or subject repository or a page on a Scientific Social Network or any form of commercial site'.
- **Scientific Social Network** is an 'online scientific community platform for scientific communication and interactivity which generally includes, but is not limited to, users having the ability to chat and make comments on forums, post their profiles, deposit documents in repository facilities, share information and research, find collaborators, work on shared documents together and manage collaborative projects within groups'.

Current Policy – Author Rights Policy for subscription articles for which the copyright form was submitted on or after 26 April 2016

- **Statement of Provenance** ‘This is an author-created, un-copyedited version of an article published in [insert name of Journal]. IOP Publishing Ltd is not responsible for any errors or omissions in this version of the manuscript or any version derived from it. The Version of Record is available online at [insert DOI]’.

IOP reserves the right to issue take-down notices to anyone or any site which infringes this policy or to take other action as it considers to be appropriate.

In the case of any discrepancy between the definitions contained on this page and those on the Copyright Form, the definitions on the Copyright Form will prevail.

Journals

This policy applies to all articles submitted to and published by the following Journals (each a ‘Journal’ and together the ‘Journals’):

- 2D Materials
- Biofabrication
- Bioinspiration & Biomimetics
- Biomedical Materials
- Biomedical Physics & Engineering Express
- Classical & Quantum Gravity
- Convergent Science Physical Oncology
- European Journal of Physics
- Flexible and Printed Electronics
- Inverse Problems
- Journal of Breath Research
- Journal of Geophysics and Engineering
- Journal of Micromechanics and Microengineering
- Journal of Neural Engineering
- Journal of Optics
- Journal of Physics A: Mathematical and Theoretical
- Journal of Physics B: Atomic, Molecular and Optical Physics
- Journal of Physics: Condensed Matter
- Journal of Physics D: Applied Physics
- Journal of Physics G: Nuclear and Particle Physics
- Journal of Radiological Protection
- Laser Physics
- Laser Physics Letters
- Materials Research Express
- Measurement Science and Technology
- Methods and Applications in Fluorescence
- Metrologia
- Modelling and Simulation in Materials Science and Engineering
- Multifunctional Materials
- Nanotechnology
- Nano Futures
- Nonlinearity
- Physica Scripta
- Physical Biology
- Physics Education
- Physics in Medicine and Biology
- Physiological Measurement
- Plasma Physics and Controlled Fusion
- Plasma Sources Science and Technology
- Quantum Science and Technology
- Reports on Progress in Physics
- Semiconductor Science and Technology
- Smart Materials and Structures
- Superconductor Science and Technology
- Surface Topography: Metrology and Properties
- Translational Materials Research

For further information, please refer to IOP’s [FAQs](#).

For CHORUS requirements, please refer to IOP’s [Open access page](#).

If you have any questions about this policy, please contact permissions@iop.org.
